

CS2 demo video — planning brief

This document lets you (the planning chat) direct cinematic videos made from CS2 demo recordings. Another Claude (in Claude Code, on the PC) has the demos, the full map geometry and the renderer. It turns your shot list into video. Everything below was generated from the actual demo data and map files.

1. What you are planning

- Each demo is a recorded free-roam session of two players (**Caillou (Canadian now)** and **Lightning Lemur**) on a workshop map. There are no rounds or scores. Lightning Lemur mostly stands still; Caillou does most of the moving.
- Output: 2560×1440, 60 fps. The final look is the default: in-game ambient occlusion and depth of field, motion blur, cinematic grade, 2.39:1 letterbox.
- Any camera is possible: first person, a player's own view, or a free camera anywhere on the map, still or moving. Cameras are checked against the real map geometry, so they never sit inside walls, and each shot is checked so the subject is actually visible.
- **Style the director likes:** mostly still or slowly zooming shots. Special or intense shots (handheld, dolly zoom, dutch angle, drone moves) are reserved for intense moments, with plenty of normal shots between them so the special ones keep their effect. Avoid cameras pinned to or chasing the character unless there's a reason.

2. How to read the maps

- **Floors** are lettered A, B, C... from lowest to highest. Only floors the players actually used are drawn.
- **Grid squares** (for example F7): columns A, B, C... run west→east and rows 1, 2, 3... run north→south. The same grid is used on every floor of a map. One square is 256 units (about 6.5 m; a player is about 72 units tall).
- **Spaces** (for example C12 = floor C, space 12) are rooms, corridors and nooks detected from the geometry. Nooks are small pockets and corners.
- **Landmarks** (L1, L2...) are numbered objects: **+** signs, posters, pictures and named objects (read from head-on renders of the actual textures); **■** doors; **◆** props; **▲** exit signs. The numbering is per demo. "off-grid" means the object is outside the area drawn for that demo.
- **Routes:** each player's path in their colour, with arrows every 5 s and m:ss labels every 15 s. **★** marks a spot where someone stood still for 6 s or more.
- **Movement timeline:** every 5 s, each player's *floor-space grid-square state*, for example C•C12 F7 walk. *still / walk / run* is their movement at that moment.
- Times are demo time (m:ss from the start of the recording). The renderer is exact to 1/64 s.

3. What to send back: the shot list

One line per shot, in order. Fields:

DEMO: C1		TITLE: (optional)			
#	start-end	shot (catalogue name or number)	subject	camera place	options / notes
1	0:12-0:18	1 Locked-off static (wide)	Caillou	floor C, C12, looking at L85	slow zoom 100→85%
2	0:18-0:22	11 Over-the-shoulder	Caillou→Lemur	behind Caillou, right shoulder	—

3 | 0:22-0:30 | 7 Landmark shot | L118 sign | from C13 doorway | hold 3 s after he leaves
HIDDEN: (optional) places that must never be on screen during given times, e.g. "N1 nook C29, 4:55-5:03"

- Places can be a space ID, grid square, landmark number, or "auto" (the renderer picks the best clear spot).
- Shots can overlap or leave gaps; each is cut in order. A typical shot lasts 3–9 s.
- Rough drafts are fine. The Claude on the PC checks every place and time against the real map and demo data, flags anything that won't work (for example, a player not visible from that spot), and suggests fixes before rendering.
- Useful beats to cut on: the **key moments** table for each demo (jumps, knife swings, shots, damage, teleports) and the ★ still spots.

4. What isn't known

- Voice chat, facial expressions and exact animations (for example, which knife move played) aren't in the data.
- Landmark names come from textures and file names. Some are descriptive rather than exact (for example "framed photo: three students posing"). Areas the players never visited aren't drawn.
- Foreign text is translated, with the original in quotes.

5. Shot catalogue (sorted by expected frequency)

1. Very frequent — still and slowly moving frames

#	Shot	What it is	Key options
1	Locked-off static (wide / medium)	Still camera placed so the whole action stays in frame	framing wide/medium/close, height, lens, position (or auto), dutch roll
2	Slow zoom	Still camera, the lens creeps in (or out) over the shot	zoom amount (e.g. 100→80%), framing
3	Eye-level lock-off (arrival)	Still frame at eye height down the space they walk into	lens, how far ahead
4	Ground-level lock-off	Lens on the floor; they run away from it or toward it	away/toward, lens height, lens
5	Liminal lock-off	Wide, still, eye-level frame down an empty hall they slowly enter	lens (wide), look-ahead
6	Empty-room / establishing wide	Wide still frame where the space dwarfs them	framing margin
7	Landmark shot	Frame or slow-zoom on an object (EXIT sign, door, painting...)	object (map legend L#), start/end lens, duration
8	Tripod pan	Fixed camera that pans to follow them	framing, operator lag
9	Stalker / voyeur	Hidden watcher far away, long lens, tucked behind a wall edge, slight shake	distance, position (or auto / at a real watcher)
10	Hold / linger	Frame stays after they leave (or before they enter)	which side, duration

2. Frequent — coverage and relationships

#	Shot	What it is	Key options
11	Over-the-shoulder	Behind one player's head/shoulder, framing the other	whose shoulder, left/right, distance
12	Overhead (fixed)	Bird's-eye, straight down, fits the action	height, rotation
13	Push-in	Camera moves slowly toward them	start/end distance, angle
14	Pull-out / reveal	Camera moves away, revealing the space	start/end distance

15	First-person POV	Their own view (CS:DM default spectate)	player
16	Low angle (menace/hero)	From below, looking up at a player	height, distance
17	High angle (vulnerable)	From above, looking down at a player	height
18	Negative space framing	Subject off to one side, empty space where a threat could be	side, amount
19	Two-shot	Both players in one still frame	framing
20	Shot / reverse-shot	Alternating over-the-shoulders for a face-off	cut points

3. Occasional — camera moves with the action

#	Shot	What it is	Key options
21	Follow (Steadicam)	Behind them, smooth	distance, height, lens
22	Lead	In front, walking backwards facing them	distance
23	Side tracking (dolly)	Parallel to them	side, distance
24	Overhead tracking	Bird's-eye drifting with them	height
25	Arc	Swings partway around them	start/end angle
26	Crane	Rises or drops while framing them	start/end height
27	Camcorder POV (found footage)	Their eyes + camcorder inertia + wide lens + shake	shake amount, lens
28	Camcorder follow	Second person filming right behind them	distance, shake
29	Chase cam (3rd person)	CS2's spectator chase camera	—
30	Floating low Steadicam	Low, too-steady corridor follow (The Shining)	height, distance

4. Special — reserve for intense moments

#	Shot	What it is	Key options
31	Dolly zoom (Vertigo)	Camera moves in, lens widens: background warps, subject same size	direction, amount
32	Dutch angle	Tilted horizon on any shot	roll degrees
33	Handheld (any shot)	Operator drift, jitter, footsteps	0.5 subtle / 1 documentary / 2 frantic
34	Handheld chase	Tight, shaky, right on their heels	shake, distance
35	Drone flyover / orbit / rise	Sweeping aerial move with its own path	altitude, move type
36	Dropped camera	Camcorder lying tilted on the floor, still recording	tilt
37	Crash zoom / snap zoom	Very fast lens change onto a subject or object	target, speed
38	Whip pan	Fast pan between two subjects or places	from/to
39	Rack focus	Focus shifts between a near and far subject	from/to distance
40	Slow motion	Record at 120/240 fps and play at 60 (2×/4×)	speed
41	Speed ramp / freeze frame	Speed changes or a held frame mid-shot	where, how long
42	Follow a grenade / object	Camera tracks a projectile	object

Look and quality options (per scene or per shot)

Option	What it does
Final look (default)	ReShade look + motion blur + cinematic 10-bit grade + letterbox
ReShade presets	look (AO + DOF + grade + deband), clean (deband only), off
Ambient occlusion strength / depth-of-field focus	Stronger/softer contact shadows; focus distance or autofocus point
Motion blur	On/off, shutter (0.25–1.0), input fps
Grade	Cinematic (default), camcorder/VHS, none; letterbox on/off; grain/vignette strength
Lens / field of view	Any focal length per shot; animated zooms
HUD	Hidden in cinematic shots; kill feed or full HUD if wanted
Hidden place	A spot/pocket that must never be on screen in a scene
Subject switching	Follow another player while one is hidden
Skybox colour / texture	mirv_sky (outdoor maps)
Remove glow / name tags / change smoke colours	mirv_glow, mirv_colors
Depth / matte passes	For compositing in an editor (fog, focus, masks)
Editing-grade output	ProRes / image sequences for DaVinci Resolve
Supersampling (4K → 1440p)	Cleaner edges

6. Demos in this brief
